

# Setting up the traffic lights

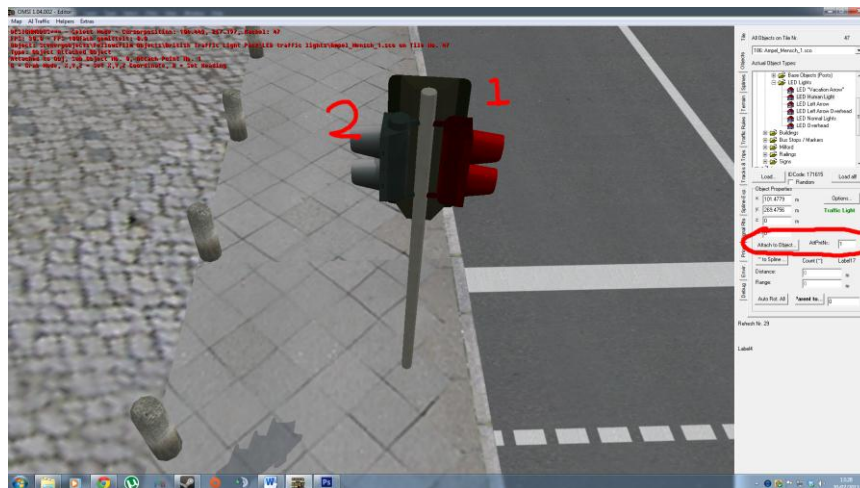

1) First place the main pole that the traffic lights will be attached to:

2) Place the LED normal car light which we will then attach to the pole at position 0:

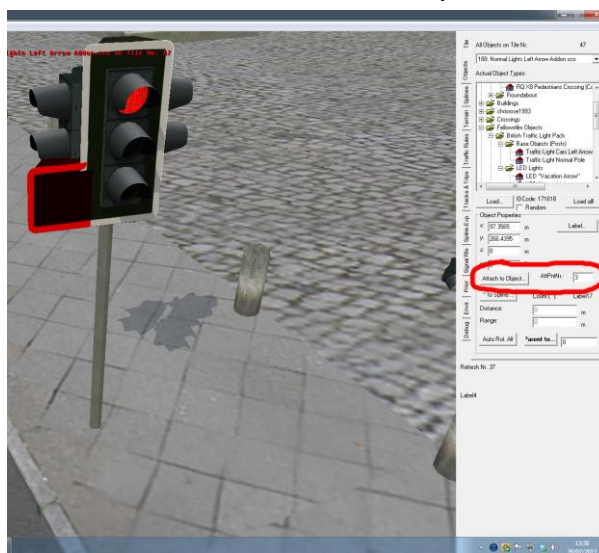

3) To add pedestrian lights we can attach them to pos' 1 & 2:

Now the normal lights are done!

To add the vacation arrow addon:

1) Attach the module to the main unit at pos' 3 - **IMPORTANT!**

2) Attach the Vacation arrow to the addon module:
